younesmod

Flask + Redis Counter with Docker Compose

A lightweight, containerized Flask application that tracks page visits using Redis.

Link: <https://github.com/younesmod/docker-flask-redis-counter>

Ansible Server Foundation

Ansible project for rapid and automated DevOps server provisioning.

Link: <https://github.com/younesmod/ansible-devops-foundation>

Shell Productivity Boost

A collection of essential aliases and functions to supercharge your shell experience

Link: <https://github.com/younesmod/shell-boost>

Dockerized To-Do API / Hello World App (NodeJS)

A simple Express app that demonstrates how to containerize an application using Docker.

Link: <https://github.com/younesmod/docker-nodejs-hello-world>

Dockerized To-Do API / Hello World App (Python)

A simple Flask app that demonstrates how to containerize an application using Docker.

Link: <https://github.com/younesmod/docker-python-todo-api>

Dockerized Static Website

A simple nginx-based/dockerized project

Link: <https://github.com/younesmod/dockerized-static-website>

CD Pipeline Project

Continuous Deployment Pipeline for Node.js Applications / first project that I learned a lot from
